

To Whom it may concern

Dear Sir/ Madam

### LETTER OF REFERENCE

Date 10/01/2018

We hereby confirm that we have recently used PKIG sp. z o.o. to undertake survey work for a project in Bielsko Biala in Poland and have found them to be a trustworthy partner in the scope of modern geodetic measurements.

In 2017 PKIG has conducted 2 measurement surveys relating to the analysis of floor settlement in a large warehouse building. The measurements were taken using 3D laser scanning technology and precise levelling, thanks to which we have acquired sufficient detailed data, which clearly indicates the relative deviations in the floor slab levels of the storage hall.

The employees of PKIG have shown to possess good organization skills. All works were conducted in accordance with the agreed schedule and without any inconveniences to the tenant.

We would like to express our gratitude to PKIG for their valued cooperation and input to our projects and we hope that we can continue to develop our working relationship in the coming year and beyond.

Yours sincerely
